

(ASF22) According to the Canada Occupational Health and Safety Regulations, an oxygen deficient atmosphere means an atmosphere in which there is less than ___ per cent by volume of oxygen at a pressure of one atmosphere or in which the partial pressure of oxygen is less than 135 mm Hg:

- a. 21%
- b. 20%
- c. 19%
- d. 18%

(LEB) A CRSP's knowledge of OH&S issues is quite different than non-safety professionals. In this case, that different knowledge of hazards and their mitigation would place a:

- a. Standard of care equal to any fellow worker in Canada. We are, by law, "our brothers and sisters keepers"
- b. High standard of care for warning and providing solutions to health and safety related issues
- c. Legal liability to give advice without error
- d. Standard that does not exceed The Code of Professional Conduct
